

**Globaltint<sup>®</sup>**

**Wood Oil**

**Deco & Protect**

## Description

Globaltint Wood Oil is a Cashew Nut Oil Shell Liquid (CNSL), obtained by distillation and modified with emulsifiers.

## Product properties

Globaltint Wood Oil is especially suited to formulate non-film-forming wood stains and impregnating wood protection, diluted with water.

Only appropriate with oxide transparent pigment - DC Y42T | DC R01T | FA B11.  
Show very good weather resistance.

## Characteristics

- |                               |             |
|-------------------------------|-------------|
| • Viscosity (25°C) Brookfield | 50-90 mPas  |
| • Density (25°C)              | 0.93 - 0.94 |
| • Solids %                    | 100         |

## Application

- Wood impregnation;
- Wood stains.
